I am originally from Austin Texas and have a great wife and two wonderful kids. I am a carpenter and self taught in many avenues. My beginning chapters of creating art was all in acrylic paints on canvas. I learned early that I could build up layers and textures on the canvas that reflected what's in my visions. I love all types of art styles. Most of my art is abstract and have always been pulled to pushing the limits of what I was programmed as normal. I still consider my art creations novice because I am always learning new techniques, ideas, applications, and transmittal techniques. Another creative outlet I have been gifted with is being a musician.
