I began weaving in 1971 as a student at Southwest Craft Center in San Antonio, TX (now Southwest School of Art) and have been working professionally since 1976, concentrating on woven garments and home furnishings. Natural fibers are my reference and the delight of integrating texture and color keeps the work exciting.

I use many weaving and finishing techniques and produce items in limited quantities. Some of the work is constructed entirely on the loom and others are sewn and appliqued as well. I focus on detail and finishing and love to be working in a field where creativity and quality of workmanship are valued and where buyers expect weavings to last a lifetime or more.
